## SUBJECT INDEX

- Abdominal compartment syndrome, after congenital heart disease repair, 71–75  
 Abscess, aortic root, 280–283  
 Adhesion molecules, phosphodiesterase inhibitors and, 162–166  
 Adrenergic alpha-agonists, for sympathetic inhibition, myocardial oxygen consumption and, 364–370  
 Adrenergic beta-antagonists, for sympathetic inhibition, myocardial oxygen consumption and, 364–370  
 Aggregometry, for platelet dysfunction, in cardiopulmonary bypass, 536–540, 554–561  
 Air embolism  
 after congenital heart disease repair, 80–81  
 transesophageal echocardiography in, 387–389  
 Ajmaline test, for Brugada syndrome, 407–413  
 Albumin  
 in normovolemic hemodilution, hemodynamic changes in, 812–818  
 for volume replacement, 99  
 Allon Thermo-Wrapping Thermoregulation system, in off-pump CABG surgery, 788–792  
 Aminocaproic acid, for liver transplantation, 888–893  
 Amplatzer Asymmetric VSD Occluder, 202–208  
 Anesthesia. *See* Thoracic epidural anesthesia; Preconditioning; *specific agents*  
 Aneurysm  
 aortic, repair of. *See* Aorta, repair of  
 coronary artery, 119–120  
 left sinus of Valsalva, 276–279  
 pulmonary artery, 562–564  
 subaortic, 276–279  
 Animal studies  
 fenoldopam in ischemic kidney failure, 179–186  
 hemodynamic effects of sevoflurane, 209–216  
 intra-aortic balloon pumping effects on cardiac output determination, 320–324  
 left ventricular function evaluation, 340–346  
 lower limb ischemia-reperfusion injury, 187–195  
 meperidine effects on pulmonary vascular bed, 691–695  
 myocardial oxygen consumption in sympathetic stimulation, 364–370  
 sevoflurane-induced left ventricular depression, 358–363  
 sildenafil in pulmonary hypertension, 725–726  
 Anomalous pulmonary venous drainage, partial, 416  
 Anticoagulants  
 for CABG surgery, in prekallikrein deficiency, 580–582  
 thrombocytopenia induced by, 106–111  
 Antidiuretic hormone, in volume control, 98  
 Antifibrinolytics, for liver transplantation, 888–893  
 Aorta  
 atherosclerosis of, cardiopulmonary bypass outcome and, 149–155  
 coarctation of, 429  
 dissection of, in cocaine abuse, 458–460  
 repair of  
 bispectral index inaccuracy in, 68–70  
 bleeding control in, 570–572, 573–575, 736–741  
 bloody cerebrospinal fluid and, 269–275  
 cardiac output monitoring in, 26–30  
 with contained rupture and hemothorax, 401–404  
 deep hypothermic circulatory arrest for, 8–13, 673–677  
 with retrograde cerebral perfusion, 3–7  
 dilutional hypokalemia—induced arrhythmias in, 568–569  
 femoral or axillary artery cannulation complications in, 20–25  
 hemothorax after, TEE in, 229–231  
 left ventricular perforation in, 247–250  
 statins in, 251–258  
 tracheostomy after, 14–19  
 transesophageal echocardiography, 772–776  
 Aortic arch, anomalies of, 429  
 Aortic root abscess, 280–283  
 Aortic valve  
 bicuspid, 428  
 repair of  
 bleeding control in, 573–575  
 persistent ST elevation after, 397–400  
 replacement of  
 intraoperative pacing in, 117–118  
 in Parkinson's disease with deep-brain stimulation, 707–708  
 transesophageal echocardiography during, 847–849  
 stenosis of, dobutamine stress echocardiography in, 862–866  
 Arginine vasopressin  
 in hemorrhagic shock, 167–172  
 for hypotension, after pheochromocytoma resection, 394–396  
 Arrhythmias, in dilutional hypokalemia, in autologous transfusion, 568–569  
 Arterial switch operation, for transposition of great arteries, 428
